Straw vote: How many Board members could support reducing the wall on Barker Pass Road by 9-inches in height as originally approved? (3 passed/2 opposed). 3/2 passed.

**Motion: Continued indefinitely to Full Board with comments:**

- 1) Provide revised plans of the walls with accurate site sections and elevation measurements to accurately reflect the current "as-built" conditions of the previously approved 6-foot high wall along the entire length of the wall along the interior property wall, and to ensure maintaining the maximum 6-foot height.
- 2) The Board finds the "as-built" changes to the wall along Barker Pass Road is acceptable, with the additional 9-inches in height, providing that the area in front of the wall (on the Barker Pass Road side) provides substantial landscape screening and a maintenance plan to be maintained at the height of the wall along Barker Pass Road.
- 3) Return with a landscape and grading plan with mitigation of drainage and storm water management in relation to neighboring adjacent properties.
- 4) Relocate the proposed street trees along Barker Pass Road to the street level.
- 5) Provide approval of the revised landscape plan by Ann Marx, Fire Inspector II, for compliance with High Fire Area requirements.

Letters of concern from Greg Smith, Kristine Cetrulo, Jerry Lu Wright, Joanna Morgan, Stan Krome, Grace Peterson, Louis de Bourbon, Bruce Peterson, JoAnne Thompson, and Paula Westbury were acknowledged.

Public comment closed at 5:50 p.m.

Staff clarified that the project site is not located in the High Fire Risk area; therefore, the Fire Department will allow the green roof. However, due to access constraints, the Fire Department is requiring that the residence be built to high fire standards and include fire sprinklers and an alarm system.

**Motion: Continued indefinitely to Planning Commission for return to Full Board with comments:**

- 1) The Board had overall positive comments regarding the project's general design style, and quality of architecture, materials, and color palette to be appropriate for the neighborhood. The Board acknowledges for the record that the purpose of their review is for the design aesthetics, and defers all other land related and environmental concerns to the Planning Commission.
- 2) The Board suggests the design incorporate design elements to be consistent with Guideline No. 27, of "Height and Proportions" of the Single Family Residential Design Guidelines.
- 3) Study the cantilever element for further design refinement; suggestions include exploring the possibility of supporting the proposed cantilever with an element below it such as stone arches or columns so that it doesn't appear like an obvious cantilever.
- 4) The Board is supportive of the proposed flat roof, as it provides for minimal obstruction of public views.
- 5) Provide additional photographs, site sections, and information on the proposed solar photovoltaic array.
- 6) Provide a site landscape plan and clearly specify all existing trees to remain and proposed to be removed.
- 7) Provide the Board with a story pole plan for the next review and approval, prior to on-site installation.
