Engineering Division

Construction Notice

New Water Mains for East Beach Neighborhood

PROJECT: The City of Santa Barbara is replacing old water piping, valves, and hydrants to reduce water main breaks and conserve water.

LOCATIONS: Orilla del Mar, Corona del Mar, a short section of Ninos Drive, and East Cabrillo Boulevard from Corona del Mar to Ninos Drive

PROJECT SCHEDULE: April through August 2017

WHAT TO EXPECT: During construction, you will notice heavy equipment, construction workers, and traffic at the construction sites (see map). The City contractor will carry out necessary temporary traffic control measures, such as detours and reduced speed zones, to allow vehicles and pedestrians to safely pass the construction site.

You will be able to access your driveway, but there may be short delays as construction equipment is being moved. During construction hours, from 7:00 A.M. to 5:00 P.M., you can expect noise from construction vehicles and equipment. Your water service may be disrupted while you are being connected to the new water main. You will receive a letter or door hanger with details about the date and duration of the shutdown.
