

Measure A Sidewalk Infill Projects Begin

Missing sidewalk links on Old Coast Highway

Construction of the Old Coast Highway and North La Cumbre Road Sidewalk Infill Projects will begin on May 13. The purpose of the work is to create continuous sidewalks along these roads for pedestrians, particularly students traveling to and from school, by installing missing sidewalk links. The work is funded by Measure A Safe Routes to School, with City match funds.

Work on Old Coast Highway will take place between Salinas Street and 441 Old Coast Highway, and work on La Cumbre Road will take place between La Cumbre Hills Lane and Pemm Place. S&H Civilworks will perform the construction, which is expected to last approximately three months.

Traffic will remain open in both directions during construction, with some impact to street parking. Pedestrians should expect sidewalk closures and will be detoured to use the opposite side of the street.
