

Road Repair on Anacapa Street

Point repair

As part of the Fiscal Year 2019A Pavement Maintenance Project, funded by Measure C, Granite Construction will perform asphalt point repairs on Anacapa Street for the next two weeks. Point repairs are spot repairs to localized asphalt failures and are typically performed prior to placing slurry on the street. This is a cost-effective way to extend the life of a roadway surface. Anacapa Street is scheduled to be slurry sealed this winter/spring.

The first part of the point repair work will occur August 28-30 between Constance Avenue and Micheltorena Street. This portion of Anacapa will be closed to traffic, with detours and parking restrictions in place during construction hours only (7 a.m.-5 p.m.). Local access for residents will be maintained to the extent possible during construction hours. Residents should expect potential delays and interruptions in accessing their driveways.

The second part of the work will occur September 3-6 between Anapamu Street and Haley Street. Expect a one-lane closure, parking restrictions, and potential delays on Anacapa during this work.
