

Mission Street Project Update

New access ramp at the corner of Mission and Bath Streets

Granite Construction is continuing to work on the storm drain connection at the northwest corner of De La Vina and Mission Streets. De La Vina is open to through traffic starting today.

This past weekend, Granite poured the sidewalk access ramps at the northeast and northwest corners of Castillo and Mission Streets along with the concrete cross gutter. This week, Granite will pour the final access ramp at the northwest corner of De La Vina and Mission Streets, completing all concrete access ramp work by the end of the week.

The Mission Street Paving Project is scheduled to be completed by mid-October.

The City is appreciative of the community's continued patience and cooperation during this important safety project. To receive updates, please subscribe on the project website: www.SantaBarbaraCA.gov/MissionStreetPaving
