Lighting and Curb Work on Voluntario Street

Construction is tentatively scheduled to begin on January 22 for a Safe Routes to School project on Voluntario Street. Funded by a state Active Transportation Program grant, this project will address the pedestrian involved collision pattern at the intersection of Carpinteria and Voluntario Streets. The project will construct curb extensions at the intersection of Carpinteria and Voluntario Streets. The curb extensions will encourage drivers to stop at the intersection, and pedestrian lighting along this corridor will improve safety for pedestrians, particularly students traveling to and from Franklin Elementary School.

There may be a temporary road closure on Voluntario Street between Carpinteria and Quinientos Streets, as well as detours in the surrounding area to minimize construction duration and ensure the least disruption to normal traffic flow. No-parking signs will be posted at least 72 hours prior to construction, and detour signs will also be provided.
