Concrete Construction to Begin on Cabrillo

The second significant pavement maintenance project using Measure C (local sales tax) funding is making progress on high-priority streets throughout the City. The next area scheduled for work is Cabrillo Boulevard between Garden Street and Corona Del Mar. Work in this area is tentatively scheduled to begin on January 21 or January 28, depending on weather, and will last approximately one month.

In this phase of the project, curb ramps will be constructed for ADA compliance and damaged sidewalks will be repaired, in preparation for the next phase of the project, which is crack sealing and slurry sealing of pavement. The next phase will occur in the spring.

Some temporary road closures between Calle Puerto Vallarta and Corona Del Mar should be expected in order to minimize construction duration and to ensure the least disruption to normal traffic flow. No-parking signs will be posted at least 72 hours prior to construction, and detour signs will also be provided.
